

BENNA

THE AI-POWERED LUXURY SCENT COMPOSER

Benna is the world's first AI-guided luxury fragrance instrument, a device that composes personalized **olfactive harmonies** in real time. As one wanders through the grand royaume of fragrance, **Benna becomes both compagnon and confidant**, conversing softly through its advanced voice interaction, mood-detection to gently shape one's mood, one's home, one's very atmosphere.

Drawing upon a **collection of eight noble fragrance bases**, Benna observes not only **the emotional timbre** but also the **weather, the season** and the delicate moments that weave the fabric of daily life. No soul forgets *l'odeur de la maison de grand-mère* — where warm cake rested upon the table, where **tendresse** and childhood dreams lingered in the air. Benna aspires to rekindle such memories, to evoke the poetry of scent and the intimacy of home.

BENNA – THE AI-POWERED LUXURY SCENT COMPOSER

Aiming the partnership with L'Oréal Luxe benna introduce a **system** that blends advanced technology with French fragrance savoir-faire to create truly bespoke scent experiences.

8 Premium Fragrance Bases

Inspired by luxury perfume families — floral, woody, amber, fresh, green, gourmand, and more. These bases allow Benna to build *thousands* of unique compositions.

AI Mood Interpretation

Benna listens to short voice interactions and interprets *mood, emotional tone, moment of day, season, and atmosphere preferences*. Sensors analyze temperature, humidity, surrounding ambiance and even le fruit de la saison to adjust the diffusion profile.

Real-Time Scent Composition

Micro-valves blend and release ultra-precise ratios of fragrance molecules, creating a seamless, personalized aroma cloud.

Memory & Personal Profiles

Benna learns user preferences over time, creating a personalized olfactive identity.

Worldwide Scalability

Designed to be globally scalable, Benna adapts to each region with a unique combination of 8 curated fragrance bases.

BENNA – THE AI-POWERED LUXURY SCENT COMPOSER

FEASIBILITY — Realistic, Durable & Profitable

Technically Feasible

Benna is built on **existing, proven Beauty-Tech components**: micro-valve diffusion, AI-driven recommendation engines, sensor modules, micro-dosing pumps and refillable cartridges. These technologies already exist across L'Oréal Beauty Tech devices, making Benna operationally realistic.

Cost Structure (Estimated)

- **Device production cost:** mid-range smart-home hardware
- **Retail price:** €250–€350, positioned as premium luxury tech
- **Refill cartridges:** €20–€40, only four in a package to keep the client eager to discover a new royaume of fragrances every time. creating a continuous revenue stream. This makes Benna profitable for both device sales and long-term consumable sales.

Sustainable & Long-Lasting

The refillable cartridge system minimizes waste and aligns with L'Oréal's sustainability commitments. Benna's durable design ensures long device life and reduced environmental impact.
